Professional Experience

Auditor

04/2020 – 05/2021 | Hong kong

- Made financial statements for companies
- Visited clients to audit financial records
- Formed opinion about the fairness of information presented within a company's financial statements

Profile

I am a Junior Web Engineer from Hong Kong. I graduated in Accounting and worked in the industry for a year before thinking of changing my career to Web Development. I learned HTML, CSS, React, NodeJS by reading and watching online lessons. I love using data and logic to tackle problems, and programming helps to do exactly that. I am excited to pursue a position as a Junior Web Engineer and apply my skills in developing and maintaining web services.

Projects

Message Board [↗](#)

A message board where people can post anything they like! Registered users can edit and delete their messages. Guests' messages will be deleted in 30 minutes.

Features: Authentication, MVC Structure, CRUD, API fetching

Tools: MongoDB, Express, React, NodeJS, CSS, HTML

Chaos Scroll Simulator [↗](#)

A web app simulating the results of a MapleStory Scroll that modifies a gear's stats. Try to roll as high value as possible for free! Also providing contexts and statistics.

Tools: React, CSS, HTML

Battleship [↗](#)

A game of Battleship playing against simple AI.

Computer's ships will be placed on the right for you to hit.

All ships are colored and placed in the middle.

Features: Grid, Simple AI

Tools: JavaScript, CSS, HTML

Education

Accounting, University of Miami

2015 – 2019 | Coral Gables, USA
